brargursharan6@gmail.com | Calgary, AB | +1 368-886-6149

Professional Profile

- IT Services diploma student at SAIT with hands-on tier 1 service desk and ITSM experience
- Practices in ticket triage, SLA prioritization, escalation, and documentation via ServiceNow
- Experienced in Active Directory user provisioning, password resets, and remote support
- Strong client communication skills – clear, calm and accurate under high interaction high volume
- Comfortable coordinating between end users and technical teams to ensure timely ticket resolution

Core Competencies

Service Desk & Support: Tier 1 Support, Ticket-Triage, SLA Compliance, Escalation Management

IT Operations: Incident, Problem & Change Management, ServiceNow ITSM, and Documentation

Systems Administration: Active Directory, User Provisioning, Password Resets, Group Policy, Microsoft 365

Hardware & Software: Deployment, Troubleshooting, Installation & Configuration, End-User Training

Automation & Scripting: GitHub Actions, Bash, Python, Docker

Education

Diploma – Information Technology Services *January 2025 - Present*

SAIT (Southern Alberta Institute of Technology), Calgary, AB

Key Coursework: IT Service Management, Windows Server & Active Directory Administration, Linux Administration, Advanced Networking, IT Security Fundamentals, Technical Communications

Certifications & Training

ServiceNow ITSM Simulator *2026*

ServiceNow University

- Completed on-demand simulation covering incident management, request fulfillment, SLA tracking, ticket workflow routing, and knowledge base documentation

Technical Skills

Identity & Access: Active Directory, User/Group Provisioning, OUs, Group Policy Objects (GPOs)

M365 & Productivity: Microsoft 365, Software License Assignment, Mobile Device Email Setup

Support Tools: ServiceNow ITSM, Remote Desktop, Ticketing & Workflow Management, Printer Configuration

Hardware: Desktops, Laptops, Thin Clients, Monitors, Printers – configuration and deployment

Operating Systems: Windows 10/11, Windows Server 2019/2022/2025, Linux

Networking: TCP/IP, DNS, DHCP, VLANs, Cisco IOS, OSPF, EIGRP

Security: CIA Triad, Vulnerability Assessment (Nmap, Nessus), MITRE ATT&CK, Wireshark, and System Hardening

Scripting & Automation: GitHub Actions CI/CD, Bash, Python, Docker, PowerShell

Lab & Project Experience

ServiceNow ITSM Simulation — Incident & Request Ticket Lifecycle *2026*

SAIT ITSMF Lab | ServiceNow Platform

- Processed end-to-end service requests and incidents - receiving, validating, actioning, and closing tickets matching first-level service desk analyst workflows
- Triaged tickets to the correct fulfillment contact based on request type: account provisioning, password resets, software access, and hardware escalations - ensuring accurate categorization before action
- Applied SLA-based prioritization to manage queue workload; escalated high-priority requests and tracked all items to confirmed resolution with the end user before closure
- Documented recurring request types and resolution steps in the ServiceNow knowledge base to reduce repeat ticket volume and support consistent team-wide processing

User Access Provisioning & RBAC - Active Directory *2025*

SAIT Advanced Servers Lab | Windows Server / Group Policy

- Provisioned and managed Active Directory user accounts – creation, OU assignment and password resets
- Applied least-privilege access principles and configured GPO-based Role-Based Access Control
- Restricted Control Panel access for specific user groups via Group Policy
- Configured secured H: drive home folders per user and validated permissions post-provisioning
- Verified account access and resource permissions remotely via RDP

Problem & Change Management – ITIL 4 Case Study *2026*

SAIT Lab | Problem Management / ServiceNow / ITIL Framework

- Built a Dockerized Node.js Express server with automated Mocha test suite; configured a GitHub Actions workflow to trigger builds, run tests, and report status on every push
- Managed the full pipeline lifecycle: version control, containerization, automated testing, and deployment scripting - demonstrating practical scripting and infrastructure automation skills

IT Security & Vulnerability Assessment *2026*

SAIT ITSC 300 Lab | Windows / Linux / Kali Linux / Nmap / Nessus

- Performed structured vulnerability assessments using Nmap and Nessus - identifying open ports, misconfigurations, and unpatched services across Windows and Linux environments
- Documented findings, business impact, and remediation steps in a formal technical report
- Applied the CIA Triad and AAA framework in hands-on Windows and Linux environments; performed controlled malware analysis.

Power Platform Hackathon – Campus Incident Reporting App *April 2026*

SAIT Power Platform Hackathon | Power Apps / SharePoint / Power Automate

- Built a Campus Incident Reporting App using Power Apps
- Integrated SharePoint as the data backend for incident storage and retrieval; automated email notifications and staff assignment routing using Power Automate cloud flows
- Led full UI/UX design and app functionality; collaborated with team member who built the Power Automate flows – delivered a working demo within the hackathon timeframe

- Gained hands-on experience with the Microsoft Power Platform ecosystem: Power Apps, Power Automate, and SharePoint integration in a low-code enterprise environment

Work Experience

BridgeUp - Co-Founder & Technical Lead *2026*

Not-for-Profit Platform | Fraud Prevention & Intergenerational Tech Education

- Co-founded a Canadian social enterprise delivering digital fraud prevention coaching to seniors via a B2B institutional model
- Led full-stack platform development, end-user documentation, and stakeholder communication across technical and non-technical audiences
- Translated complex technical concepts into accessible training materials - directly applicable to end-user support and client coaching

Sales Advisor (Seasonal) *October 2025 – March 2026*

Best Buy Canada, Calgary, AB

- Helped customers identify the right hardware and technology solutions by asking targeted questions and explaining technical options clearly - whether the person was tech-savvy or entirely new to the product
- Regularly coached less experienced colleagues on product knowledge and how to handle complex or frustrated customers, ensuring consistent service quality across the team
- Managed a high daily volume of interactions across in-person, phone, and chat channels - maintaining patience and accuracy even during peak periods

Volunteer Experience

Community Volunteer *2025*

Calgary Drop-In Centre, Calgary, AB

- Provided client support and assisted with daily facility operations and resource distribution for individuals experiencing homelessness

Seva Volunteer *2025 – Present*

Dashmesh Culture Centre – Gurdwara Sahib, Calgary, AB

- Prepared and served community meals; supported event coordination for religious and cultural programs
